

Referral & Admissions Guide for Clinicians and Parents

Call Us Today for a Free Consultation

What Happens When I Call Evolve About Services?

When you reach out to us, the first thing we do is listen. We want to understand who your child is, what is happening in your family, and what interventions you've tried so far. We'll also answer any questions you have about Evolve. Once we determine what level of care seems most appropriate for your child, we will schedule the pre-admission assessment.

Pre-Admission Assessment

The next step is gathering details and necessary documentation. We conduct an in-person or phone assessment to ensure that Evolve will be able to help your teen. Once the assessment and documents have been reviewed and cleared by our clinician, we arrange for admission.

Throughout the pre-admission process, we ask for information such as:

- Symptoms and behaviors
- Diagnosis and treatment history
- Current and previous medications
- Current provider information
- Pertinent records: Individualized Education Program (IEP) and IEP testing, hospital records, and psychological testing, if applicable

Note to Referring Providers

Evolve is dedicated to working with our clients' treatment providers. From determining level of care to treatment and discharge planning, our team values communication. To ensure continuity of care and seamless collaboration, please have a Release of Information (ROI) signed. Thank you for recommending Evolve Treatment Centers.

Evolve Treatment Centers

Mental Health & Addiction Treatment For Teens

Evolve Treatment Centers, accredited by CARF and The Joint Commission, offers the highest caliber of evidence-based treatment for adolescents, 12 to 17 years old, who are struggling with mental health, substance abuse and/or behavioral issues.

A Full Continuum of Care for Adolescents 12-17 Years Old

Residential Treatment Center (RTC) - Residential treatment at Evolve provides clients with 24/7 staff support and supervision. Evolve's multidisciplinary treatment team includes psychiatrists, licensed clinicians and nursing staff. At this level of care, teens receive three individual therapy sessions, two family therapy sessions, and one psychiatry session per week. In addition, the robust daily schedule includes group therapy, psychoeducation, experiential therapy, and academic hours. Evolve is dedicated to individualized care and the highest safety standards.

Partial Hospitalization Program (PHP) - Evolve PHP provides clients with a full day of programming five days a week. Clients receive daily group sessions and academic support in addition to two individual therapy sessions, one family therapy session, and one psychiatry session each week.

Intensive Outpatient Program (IOP) - Evolve IOP provides clients with a minimum of three hours of programming several days a week, depending on the client's individual needs. At this level of care, teens receive daily group sessions, and one individual therapy session, one family therapy session, and one psychiatry session each week.

Insurance

During our initial phone call, we gather your insurance information and conduct a complimentary verification of benefits to determine your coverage.

We have relationships with most private insurance companies, and are in-network with Anthem and HealthNet.

We operate on an in-network or out-of-network basis, depending on your provider and your plan. If we are out of your network for mental health or substance abuse treatment, we will seek a Single Case Agreement. This is a contract between a health care provider and an insurance company, made on a case-by-case basis, so that in-network benefits can be accessed.

Visit our website or call our admissions team today to schedule a free assessment, request a free verification of benefits, or learn more about our full continuum of care.
